

Monday

1. Solve:  $3(4 - 2) + 2(6 \div 2)$
2. Combine all like terms:  $4 + 2x + 7 - x - 3$
3. Distribute AND THEN combine all like terms:  $3(x - 7) + 2x - 2(x + 1)$
4. Model -5 and 3 using Heaps and Mounds:  
 -5 \_\_\_\_\_      3 \_\_\_\_\_
5. Solve:  $|-4| - 1$

Tuesday

1. Using the symbols below and zero pairs, what is  $-2 + 3$ ?  
 + + +  
 - -
2. Using symbols and zero pairs, what is  $5 + (-7)$ ?
3. Using heaps and holes, what is  $6 + (-2)$ ?  
 \_\_\_\_\_
4. Using heaps and holes, what is  $-7 + 3$ ?  
 \_\_\_\_\_
5. Using a number line, what is  $4 + (-6)$ ?

Wednesday

1. Using the symbols below, what is  $5 - 2$ ?  
+ + + + +
2. Using symbols and zero pairs, what is  $3 - 5$ ?
3. Using heaps and holes, what is  $2 - 6$ ?
4. Using heaps and holes, what is  $-7 - 4$ ?
5. Using a number line, what is  $5 - 8$ ?

Thursday

1. Using any method, what is  $2 - 6$ ?
2. Using any method, what is  $-3 + 5$ ?
3. Using any method, what is  $-1 + 8$ ?
4. Using any method, what is  $4 - 9$ ?
5. Using any method, what is  $3 - (-4)$ ?
