Write your answer as an improper fraction.</p> $3\frac{3}{4} + 5\frac{4}{5} =$ <hr/>	<p>What is the order of operations?</p> <hr/> <p>What does it mean to combine like terms?</p>																																																																															

Thursday

Tony needs 2 pounds of ground beef for his recipe. If 3 pounds cost \$15.75, how much will 2 pounds cost?

Write an expression for the following situation and solve.

In the first quarter of a football game, Cam gained 15 yards, lost 2 yards, gained 6 yards, gained 2 yards, and then lost 4 yards.

Problem 1
